Dredge Vessels: Maritime Provinces.

Dredge No. 1 (\$79,675.27)—

Master, C. F. Lewis, Apr.-Mar., \$1,500, outlay, \$19.34	1,519 34
Chief engineer, Henry Fosbrooke, Apr.-Mar.	1,500 00
Salaries of crew and carpenters, \$15,497.54; board of crew, \$4,365.10	19,862 64
American Steam Laundry, laundrywork	78 30
Bell, Thomas & Co.: hard pine, 9,553 ft., \$429.88; freight, \$40.67; cartage, \$24	494 55
Brandram-Henderson: paint, 90 gals., \$121.80, anti-corrosive comp., \$84, anti-fouling comp., \$150; thinners for paint, 17 gals., \$25.50; oil, 15 gals., \$10.20; zinc, 100 lbs., \$7.40	398 90
British American Oil Co.: water white oil, 303½ gals., \$59.18; engine oil, 92 gals., \$29.89; cup grease, 809 lb., \$51.24	140 31
Buckley, Wm. P.: coal, 50 tons at \$4.75; labour on coal, 50 tons at 35c	255 00
Canadian Fairbanks-Morse Company: steel ties, 12, \$30; white waste, 175 lb., \$18.81; sundries, \$22.57	71 38
Canadian Pacific Railway Co., freight	419 78
Christie Wood-working Co.: lumber, 1,489 ft., \$59.85; sundries, \$11.48	71 33
City of Saint John: water, 15 m. to Mar. 31, 1915, 3,563, 100 gals., \$890.76; meter rent, \$8.15	898 91
City Fuel Co.: coal, 8-26 tons, \$69.73; kindling wood, \$6.75	76 48
Consumers Cordage Co.: manilla rope, 3,215 lb., \$433.39; sundries, \$13.60	446 99
Dept. Marine and Fisheries: tumbler bearing plate, 2,689 lb., \$176.47; 2 c.s. bushes, \$39 lb., \$61.62; indirect charges, \$53.10	291 19
Dominion Coal Company, coal, 1,165-47 tons at \$4.25	4,953 28
Doyle, F.: diving, 2 d., including 6 men, scow, towage, gear, etc.	72 00
Driscoll, J. M.: sundry lumber, 5,581 l. ft., \$204.23; deal, 2,070 ft., \$37.26; sundries, \$35.51	277 00
Dunlop Tire and Rubber Goods Company: dredge bucket rubbers, 217-68 lb.	195 92
Estey & Co.: water hose, 200 ft., \$130; steam hose, 50 ft., \$50; sundries, \$22.60	202 60
General Supply Co. of Canada: steel wire rope, 910 ft., \$84.35; sundries, \$5.75	90 10
Gregory, H. S. & Sons: slippage, 242 d. at 75c	181 50
Halifax Graving Dock Company: alterations to bulkhead, \$425; pumping out dock and arranging blocks for dredge, \$600; dockage, 1,694 tons, 1 d., at 20c per ton per day; 1,694 tons, 12 d., at 12½c per ton per d.; labour, 877 h., \$274.10; use of shop and tools, \$25; water and use of hose, \$33.40; sundries, \$40.96	4,278 26
Holder, Geo. E.: boat cover and 2 cylinder covers, \$30.70; duck, 36 yds., \$14.40; sundries, \$31.47	76 57
Intercolonial Railway, side wharfage, 123 d.	123 00
Jamieson, R. C. & Co.: paint, 195 gals., \$174.15; oil and varnish, \$23.88	193 03
Lahey, James F., scaling, scraping and painting dredge	1,000 00
Lillie Steamer and owners, towing, 7 h. at \$8	56 00
Maritime Dredging and Construction Co., Ltd.: services of dredge <i>Beacon Bar</i> , 11 d. at \$80, 4 d. at \$75, 13 d. at \$50; use of hoister, \$30	1,860 00
McAvity's Wharf, end wharfage, 15 m. to Mar. 31, 1915	5,490 00
McGivern, James S., coal, 13-872 tons	119 86
McLachy, A. J. Co., anti-corrosive paint, etc., 748 lb.	89 08
<i>Nereid</i> Steam Tug and owners: tending dredge, 133 d., \$5,320; sundry, \$19	5,339 00
Porter, Wm., cartage, \$37.20; Secord, Abner, cartage, \$59	146 20
Robineau, E., services as pilot on Tug <i>Fashion</i>	70 00
Sancton, S. Norman: chain with shackles, 11,473 lb., \$372.88; war insurance and freight, \$7.13	380 01
Schuller Electric Welding Co.: welding, 141½ h. at \$8; boilermakers, 77½ h., \$74.38; air hammer, 19 h., \$28.50; sundry, \$1.25	1,236 13
Simmonds, James: rubber packing, etc.	69 54
Sowards, James Coal Co.: rent of wharf for mooring scows, \$50; looking after scows, 7 m., \$70	120 00
Splane, J. & Co.: manilla rope, 2,170 lb., \$325.96; steel wire, 984 ft., \$246; sundries, \$101.63	673 59
Swift, James, soft coal, 13-425 tons at \$5	67 13
Thorne, W. H. & Company: copper wire, 52½ lb., \$18.38; sundries, \$106.33	124 71
Twin City Oil Co.: class "C" automatic oiler, \$200; metallic packing, 25 lb., \$18.75	218 75
Foundrywork: Campbell Steel and Iron Works, \$247; Castings of Ottawa, Ltd., \$263.90; A. H. Coplan & Co., \$652.80; Dominion Machine & Supply Company, \$257.40; Halifax Engineering Co., \$1,708.24; Hull Iron & Steel Foundries, \$13,527.26; Wm. Lewis & Son, \$4,025.56; Maass Bros., \$188.50; John W. Pask, \$257.20; C. L. Perkins Machine Co., \$257.40; Union Foundry & Machine Works, \$2,692.79; J. Fred Williamson, \$737.22; 2 small payments, \$8.52	24,823 79
Small payments: water, \$67.84; coal, \$35.13; packing, \$34; cup grease, \$25.31; engine oil, \$28.20; wharfage, \$21; asbestolene, \$21.57; laundrywork, \$19.90; labour, \$40.06; groceries, \$31.95; sundries, \$293.16	618 12

Dredge No. 2 (\$19,592.01)—

Master, Chas. Powell, Apr.-Mar., \$1,124.31; board of crew, \$1,886.50; travel and outlay, \$95.98	3,106 79
Engineer, John Retallick, Apr.-Dec., \$904.62, watchman, Feb.-Mar., \$105.79	1,010 41
Wages of crew	4,505 88
Brandram-Henderson: anti-corrosive and anti-fouling compound, \$117; paint, \$86.50	203 50
British American Oil Co.: white oil, \$26.92, cylinder oil, \$15.84, gasoline, \$12.56	55 32

Carried forward 88,557 17

SESSIONAL PAPER No. 1

Brought forward.....	88,557 17
Dredge No. 2—Concluded.	
Canadian Oil Co.'s: oil, \$62, cup grease, \$49.92; freight, \$5.83.....	117 75
Gallop, W. A., plumbing, etc., \$307.85; E. Lantalum, pr. davits, \$61.50.....	369 35
General Supply Co. of Canada: wire rope, 1,000 ft.....	73 10
Jamieson, R. C. & Co., Ltd.: lead, \$32.32; paint, \$31.25, sundry, \$32.40.....	95 97
Noonan & Davies: 61-2 tons coal, \$214.20; freight, \$100.35.....	314 55
Northern Dredging & Construction Co., 41 tons coal.....	246 00
Pictou Foundry & Machine Co., 2 davit sockets.....	50 00
Shives, R. K., coal, 416-8 tons, \$2,375.76; Yeowell, H., cartage, \$64.95.....	2,440 71
Splane, J. & Co.: manilla rope, \$92.25; nails, \$19.50; oakum, \$17; sundry, \$71.63.....	200 38
Thorne, W. H. & Co.: manilla rope, \$103.80; sundry, \$8.60.....	112 40
Wallace, Jas.: 73 tons coal, \$407.50; sundry supplies, \$575.56.....	983 06
Foundrywork: Castings of Ottawa, Ltd., \$392.90; A. H. Coplan & Co., \$95.40; Dominion Machine Supply Co., \$297; Hull Iron & Steel Foundries, Ltd., \$2,616.68; Maass Bros., \$483.20; McLennan Foundry & Machine Works, \$1,298.89; Union Foundry and Machine Works, \$234.73.....	5,418 80
Hardware, \$48.53; travel and outlay, \$44.60; wharfage, \$30; flange globe valve, \$25; groceries, \$21.90; water, \$12; sundries, \$106.01.....	288 04
Dredge No. 3 (\$20,994.98)—	
Master, Hugh Alcorn: Apr.-Mar., \$1,230.20; board of crew, \$2,129.90; travel and outlay, \$48.65.....	3,468 75
Engineer, J. F. Cheyne: Apr.-Mar., \$1,143.87; board, \$3.50; travel and outlay, \$27.78.....	1,175 15
Wages of crew, \$5,367.41; board, \$31; travel and outlay, \$95.25.....	5,493 66
Bathurst Lumber Co.: 435-52 t. coal, \$2,613.12, 86,600 galls. water, \$216.50, lumber, \$2.70.....	2,832 32
Brandram-Henderson, 74 gals. paint, \$125.60; A. B. Crosby & Co., 15 t. coal, \$75.....	200 60
Canadian Consolidated Rubber Co.: sheet packing, \$160.50; freight, \$6.40.....	166 90
Consumers' Cordage Co.: 2,127 lb. manilla rope, \$286.50; express, \$7.95.....	294 45
Eddy, G. Co.: 180 ft. hardwood, \$15; 79 h. labour, \$23.70; sundry, \$30.90.....	69 60
Frothingham & Workman: hardware, etc., \$29.35; tar, \$12.95; sundry, \$14.30.....	56 60
Grant, A. J. & Co.: 583 lb. sheet lead, \$61.22, nails, \$1.45.....	62 67
Halifax Graving Dock Co.: 15 lay days, \$879.38; use of railway hauling, \$93.80; sundry, \$22.....	995 18
Imperial Oil Co.: oil, \$42.30, sundry, \$11.41.....	53 71
Kent, W. J. & Co., general merchandise, \$130.26; N. & M. Smith, 94 days dockage, \$470.....	600 26
Lahey, J. F.: cleaning and painting bottom of dredge, \$430; sundry, \$9.60.....	439 60
McAvity, T. & Sons: 2,400 lb. chain, \$120; sundry, \$6.62.....	126 62
Moir, W. & A.: pilot packing, \$63.75; sundry, 60c.....	64 35
Mulcahy, A. J. & Co.: adjusting 2 compasses, \$29.50; sundry, \$30.05.....	59 55
Sancton, S. Norman: 1,715 lb. anchor, \$102.90, 333 lb. manilla rope, \$49.95; 465 lb. steel wire rope, \$77.85; sundry, \$4.93.....	225 63
Splane, J. & Co.: 2,188 lb. manilla rope, \$328.20; hardware, etc., \$56.92.....	385 12
Thorne, W. H. & Co.: 2 wheelbarrows, \$24; sundry, \$59.90.....	83 90
Foundrywork: Wm. Lewis & Son, \$28.57; Miramichi Foundry and Machine Works, \$1,551.82; John Rennie, \$188.28; Union Foundry and Machine Co., \$77.17; A. A. Webber & Son, \$1,874.01; J. E. Wilson, \$96.64.....	3,816 49
Oil, \$49.30; trucking, \$45.62; cutting scows away from wharf, \$40; 2 wildcats, \$35.30; water, \$23.50; towing, \$15; paint, \$15; travel and outlay of C. E. Dalton, \$6.45; sundry, \$143.70.....	373 87
Dredge No. 4 (\$475.63)—	
Wages of crew, March, 1914, \$232.80; travel and outlay of Capt. Chas. Fox, \$23.50.....	256 30
Foundry work, Bruce Stewart & Co.....	219 33
Dredge No. 5 (\$45,490.82)—	
Master, Wm. McKenzie: April-Nov., \$920, Dec.-March, \$239.28; travel and outlay, \$85.43.....	1,244 71
First engineer, H. Allen: April-Dec., \$894.20, March, \$14.20; travel and outlay, \$16.90.....	925 30
Wages of crew, \$9,295.19; board, paid to W. McKenzie, \$3,446.30; travel and outlay, \$31.45.....	12,772 94
Brandram-Henderson: 25 gal. anti-corrosive composition, \$35; 25 gal. paint, \$32.50.....	67 50
Canadian Consolidated Rubber Co.: 12 dredge sleeves.....	702 09
Carson, J. F.: 64-25 lb. packing, \$112.45; sundry hardware, paint, etc., \$323.54.....	435 99
Carson, J. & Sons: 1,257 ft. hardwood, \$45.25; sundry lumber, \$88.12.....	133 37

Firemen at \$55, \$1,352.70; deck hands at \$45, \$1,667.90; steward, 12 m., \$540.....	3,560	20
Carter, A. E., electrician, services, 54 d., \$176.12, outlay, \$12.15.....	188	67
Darling, F. & Co., pipe covering, etc., \$79.73; Fraser, W. S. & Co., pipe, valves, etc., \$245.73.....	325	46
Dearborn Chemical Co.: Dearborn Feed Water Treatment, 2,918 lb.....	320	98
Dominion Wire Rope Co.: spec. ex. flex. plough steel cable, 690 lb., \$921.15; 3 reels, \$12.....	933	15
Fuel Oil Installation Co., No. 7 burner, \$105; McColl Bros. & Co., oil, etc., \$53.40.....	158	40
Hawkins & Hayward, electrical supplies, etc.,.....	312	34
Hickman Tye Hardware Co.: 50 ft. steam hose, \$39; 2 doz. filter towels, \$38.40; 18 pike poles, \$36; sundry hardware, etc., \$373.73.....	487	13
Hull Iron & Steel Foundries: pattern for dipper teeth, \$67; 16 dipper teeth, \$1,289.28; freight, \$174.95.....	1,531	23
Imperial Oil Co.: gasoline, \$195.20; castor oil, \$56.94; sundries, \$214.52.....	466	66
Kirk & Co.: coal, 15 tons B.C. lump, \$88.50; 20 tons nut, \$95.....	183	50
Logan, W. H.: regulating cones, 18, \$63; sundries, \$18.50.....	81	50
McDonald, Wither & Cox: hire of piledriver, \$40; piles, \$24; towing, \$8.....	72	00
McQuade, P. & Son: steel rope, 876 lb. 1½ in., \$362.31, 1,630 lb. 2-in., \$1,326.80, 1,840 lb. 2½ in., \$2,546.67; rope, 1,309 lb. at 15c., 3,666 at 15½c., 1,661 at 17c.; chain, 4,353 lb., \$484.28 paint, 63 gal., \$173.25; waste, 954 lb., \$124.02; sundry hardware, etc., \$887.50.....	6,951	76
New Method Laundry, washing, \$120.33; Peacock Bros., valve checks, \$129, \$71.....	320	33
Newson, Keen & Townley: steel rope, 239 ft., \$299.80, 230 ft. \$382.83, war duty, \$24.35.....	706	98
Powell, Geo. & Sons, kitchen utensils, etc., \$174.80; Prior, E. G. & Co., steel, etc, \$65.79.....	240	59
Robertson Iron Works, machine work, etc., \$173.35; Victoria Water Works, water, \$164.75.....	338	10
Taylor & Young: set high speed drills, \$101.03; tool grinder, \$71.09; dispersion lens, \$95.....	267	17
Turpel, Wm. & Son: repairs to dump scow, \$820; stick and labour for stern spud, \$685; sundry repairs, etc., \$2,204.30.....	3,709	30
Vancouver Engineering Works: 24 dipper teeth, \$973.10; 4 dipper teeth, \$208.30; split spur gear, \$385.65; split spur gear, overtime job, \$476.32; sundry repairs, etc., \$1,442.07.....	3,435	44
Victoria Machinery Depot Co.: fuel oil, 1,309 gal. at \$1.15, 4,302 at \$1.25; stern spud, \$534; hauling, launching, cleaning, painting tug, \$400, Mar. \$474.50, 4 extra lay days, Mar. \$160; hauling, launching and repairing, Dec. \$175; sundry repairs, etc., \$5,053.05.....	13,679	40
Wallace Shipyards: supplying and fitting up two bow spuds.....	1,225	00
Small payments: kerosene torch, \$45.15; timber, \$39.92; elec. lamps, \$28.35; coal, \$27.50; cartage, \$23.25; sundries, \$129.23.....	293	40
Meat, milk, groceries, etc.: P. Burns & Co., \$2,479.91; D. K. Chungranes, \$556.91; H. O. Kirkham & Co., \$2,725.82; Jos. Rogers, \$267.20.....	6,029	84
Tug <i>Bilten</i> , (\$16,477.75).		
Conductor, H. A. McCarthy, April—Mar., \$1,500; engineer, F. Nicholls, 12 m., \$1,200.....	2,700	00
Asst. engineer at \$75, \$737.90; foreman at \$65, \$635.31; cook at \$75, \$735.48.....	2,108	69
Deckhands at \$45, \$1,357.95; watchman at \$45, \$444.19.....	1,802	14
Carpenter at \$4.50, \$69.75; labourer, 1 m, \$50.....	119	75
Byers-Giegerich-Græn Co.: 1,000 ft. cable, \$60; sundries, \$33.75.....	93	75
Cogle, F.: services of tug <i>Ondot</i> and crew, 166½ d. at \$27.....	4,495	50
Crownest Coal Co.: coal at \$4.75, \$351.27, at \$4.95, \$304.43, at \$5.80, \$223.88.....	879	58
Hudson's Bay Co., bedding, etc., \$74.40; Irving, J. A. & Co., soap, brooms, etc, \$79.20.....	153	60
Lambert, A. G. Co., lumber, etc., \$103.89; Nelson Boat and Launch Co., towing, \$224.....	332	89
McCarthy, H. A.: board of crew, April—Mar., \$2,154, sundry outlay, \$41.90.....	2,195	90
Carried forward.....	80,268	47

SESSIONAL PAPER No. 1

Port Arthur and Fort William Improvements: Thunder Bay Contracting Co.

December 14, 1914.

GENTLEMEN.—Acting under the authority of the Hon. the Minister, I beg to advise you that it has been decided to extend your contract No. 10077 so as to include the construction and completion of a further quantity of 2,300 lineal feet of revetment wall at Fort William, Ont., as shown red between points "A" and "B" on the attached blue print.

This work is to be constructed according to plans and specifications attached to the above mentioned contract, and you will be allowed payment at the unit prices mentioned therein. All the general clauses contained in that contract will be applied to this work, with two exceptions:

(a) Any changes made in the labour schedule on May 1 next, by the Labour Department, must be accepted by you.

(b) The time of completion is to be December 31, 1915.

You will, therefore, kindly send to the Department an accepted bank cheque amounting to \$29,500, which is to be deposited as security for the proper performance of the work.

Yours obediently,

EUGENE D. LAFLEUR, *Chief Engineer.*

The Thunder Bay Contracting Co., Ltd., Port Arthur, Ont.

AUDITOR GENERAL'S OFFICE, May 19, 1915.

SIR,—I have received your application No. 92 of 12th instant for the issue of a cheque for \$13,390 in favour of the Thunder Bay Contracting Company, being for Estimate No. 1 to 1st May on Mission River Wharves, the estimated cost of which is \$305,000.

Accompanying this application is a copy of a letter dated December 14, 1914, from the Chief Engineer to The Thunder Bay Contracting Company stating as follows: "Acting under the authority of the Honourable the Minister, I beg to advise you that it has been decided to extend your contract No. 10077 so as to include the construction and completion of a further quantity of 2,300 lineal feet of revetment wall at Fort William, Ont., as shown red between points 'A' and 'B' on the attached blue print."

The contract referred to, which amounted to over \$300,000, was completed some time prior to October, 1914, and I am not aware of any authority which the Minister of Public Works had to extend or increase this contract to an additional amount of \$305,000 and I cannot understand how the Chief Engineer could advise, without such authority, that the contract was extended.

I would call your attention to 4-5 Edw. VII where it is enacted that the Minister shall invite tenders by public advertisement for the execution of such work, when the estimated cost is \$5,000 or upwards and the contract for the work shall be awarded under the direction of the Governor in Council.

So far as the papers sent me show, no tenders have been called for and the authority of the Governor in Council has not been obtained.

Under these circumstances I cannot issue a certificate for the payment asked for.

I am, Sir, your obedient servant,

J. FRASER, A.G.

The Deputy Minister of Public Works Dept.

DEPARTMENT OF PUBLIC WORKS, OTTAWA, July 5, 1915.

SIR,—With reference to your favour of May 19, respecting application No. 92 of this Department, for the issue of a cheque for \$13,390 in favour of the Thunder Bay Contracting Company, being for Estimate No. 1 to May 1, 1915, on Mission River Wharves, I beg to advise you that an Order in Council under date of June 26, 1915, has now been secured, authorizing the extension of contract No. 10077 to cover the construction of additional 2,300 lineal feet of quay wall.

I enclose for your information copy of the Order in Council in question and will be pleased if you will now issue a certificate for the payment asked for.

Your obedient servant,
J. B. HUNTER, D.M.

The Auditor General.

ORDER IN COUNCIL, 26th June, 1915.—The Committee of the Privy Council have had before them a report, dated 28th May, 1915, from the Minister of Public Works, representing that under the authority of an Order in Council dated March 14th, 1914, a contract was entered into with The Thunder Bay Contracting Company, Limited, (No. 10077) for the construction of a Revetment and Quay Walls 2,646 feet long, at the mouth of the Mission River, at Fort William, Ont., estimated, at the prices quoted for the various materials to be used in the work, at about \$365,062.06.

The Minister states that the above contract was completed in the Fall of 1914, having entailed a total expenditure, as shown by the final estimate rendered in connection therewith, of \$339,678.71;

That it is necessary to provide further accommodation at Fort William by extending the above work for a length of 2,300 lineal feet to provide urgent requirements in connection with the coal shipping facilities which are being installed by the Grand Trunk Pacific Railway Company at that place;

That the average price per lineal foot based on the prices paid for the portion of the work already built is \$128.37; on the same basis, the length of 2,300 lineal feet above mentioned would therefore cost \$295,251;

That the prices quoted by the contractors for the materials specified, etc., in their contract were obtained as a result of a public call for tenders, in November 1913, and the Chief Engineer of the Department of Public Works considers these prices fair and reasonable;

The Minister further states that one of the conditions of the specification embodied in the contract was that the dredging of the seats of the proposed cribwork was to be performed by the Department of Public Works;

That a provision for this work was included in a contract with the Great Lakes Dredging and Construction Company, Limited, for the dredging of a terminal basin at the mouth of the Mission River at Fort William, (No. 7170), viz.: that the dredging of crib-seats and back-filling behind the cribs was to be performed under said contract;

That the contract in question was entered into under the authority of an Order in Council dated February 16, 1909, the time of completion being February 27, 1915, and it is, therefore, considered advisable to extend said contract of the Great Lakes Dredging and Construction Company, Limited, in order to

SESSIONAL PAPER No. 1

have this work carried out at the prices of said contract which were obtained after a public call for tenders, these prices being:—

Scow measurement.—Rock: \$2.85 per cubic yard. All other materials: 16c. per cubic yard.

Cast over.—Rock: \$2.85 per cubic yard. All other materials: 16c. per cubic yard.

Additional prices for dumping dredged materials in structures and back of cribs, when rehandling is required: 18½ cents per cubic yard.

Rock: \$4 per cubic yard, measured in situ.

All other materials: 25½ cents per cubic yard, measured in situ;

The Minister submits that the dredging required for the crib seats of the Quay Wall extension is estimated at 50,000 cubic yards, scow measurement which, at the tender price of the contract, including overtow, will amount to the sum of \$9,500;

That the amount of back-filling required is estimated at 37,500 cubic yards which, at the prices above quoted, will amount to the sum of \$6,937.50;

That, besides the dredging of the crib-seats and back-filling of the cribs of the 2,300 feet of the Quay Wall extension, there is some additional dredging to be performed to complete what is known as "Slip No. 2", comprising the excavation of some 359,473 cubic yards of material, scow measurement. This is also an item of the contract with the Great Lakes Dredging and Construction Company, Limited, which could not be performed owing to the expiration of the period during which said contract was to run. At the tender price of the contract, including overtow, this will amount to the sum of \$66,589.87;

That the total estimated cost of the work provided for under these extensions of Quay Wall construction and dredging will amount to \$378,278.37;

That the expenditure in connection with the above works is a proper charge against the sum of \$1,700,000 granted by Parliament, at its last session, in the appropriations for 1915-16, for "Port Arthur and Fort William—Harbour and River Improvements."

The Minister, in view of the foregoing, recommends that authority be given:—

- 1.—To extend contract No. 10077 with the Thunder Bay Contracting Co., Ltd., so as to cover the construction of an additional length of 2,300 lineal feet of Quay Wall at Fort William, Ont., being a continuation of the present work at that point in the Harbour, at the prices of the contract, viz.:—

Description of Work.	Unit of Measure.	Price per Unit.
		\$ cts.
1. Timber of all kinds, in the work.....	Ft. b. m.	45 00
2. Concrete in facing blocks.....	Cu. yd.	9 50
3. Mass concrete.....	"	7 50
4. Stone filling in cribs.....	"	1 30
5. Earth filling in cribs.....	"	0 28
6. Drift bolts.....	Lbs.	0 04
7. Screw bolts, including heads, nuts, and washers.....	"	0 06
8. Lifting rings for concrete blocks.....	"	0 07
9. Mooring bollards.....	Each.	50 00
10. Waling.....	Lin. ft.	1 50
11. Drain pipes, 4" diameter.....	"	0 30

- 2.—To extend contract No. 7170 with the Great Lakes Dredging and Construction Company, Limited, for a period of three years, in order to carry out,—
- (a) The dredging of the crib-seats required in connection with the extension of the Quay Wall above mentioned, as well as the back-filling necessary therefor.
- (b) The completion of the dredging in Slip No. 2.
- The Committee concur in the foregoing and submit the same for approval.

F. K. BENNETTS,
Asst. C. P. C.

AUDITOR GENERAL'S OFFICE, July 7, 1915.

SIR,—I have to acknowledge receipt of your letter of 5th instant enclosing a copy of an Order in Council with reference to your application No. 92 for the issue of a cheque for \$13,390 in favour of the Thunder Bay Contracting Company.

Briefly stated the case is as follows:—

As a result of a public call for tenders in November, 1913, a contract was entered into with the above company for the construction of a revetment wall, 2,646 feet long, which cost \$339,678.71. This contract was completed prior to October, 1914, and the Department now proposes to extend this work 2,300 feet at an approximate cost of \$295,251. The Order in Council of the 26th June, 1915, authorizes the following:—

“To extend contract No. 10077 with the Thunder Bay Contracting Company, Limited, so as to cover the construction of an additional length of 2,300 lineal feet of Quay Wall at Fort William, Ontario, being a continuation of the present work at that point in the Harbour, at the prices of this contract.”

4-5 Edw. VII requires that the Minister shall invite tenders by public advertisement for the execution of such work, when the estimated cost is \$5,000 or upwards, after which the contract shall be awarded under the discretion of the Governor in Council. There is no provision, that I am aware of, that a contract for work, which has already been completed, can be extended without calling for tenders as above when the amount exceeds \$5,000. It appears that in this case, no tenders have been called for, therefore the Department cannot enter into a contract for this extension.

Referring to your application No. 92 of 12th May, 1915, to issue a cheque for \$13,390 in favour of the Thunder Bay Contracting Company, Limited, being for Estimate No. 1, Mission River Wharves, I beg to say that I cannot issue a certificate for such cheque on the ground that there is no Parliamentary authority for issuing the same.

This action is taken under Section 42 of the Consolidated Revenue and Audit Act.

I am, Sir, your obedient servant,

J. FRASER, A.G.

The Deputy Minister of Public Works Dept.

(NOTE.—Tenders were called for, by public advertisement, and the contract was awarded to the lowest tenderer, The Thunder Bay Contracting Co.)

Port Arthur and Fort William, Improvements: Great Lakes Dredging Co.

AUDITOR GENERAL'S OFFICE, August 11, 1915.

SIR,—Let me acknowledge receipt of your application No. 428, for \$33,694.79 in favour of the Great Lakes Dredging Co., for dredging at Fort William, Ont., under Contract No. 7339.

The application includes an item of \$8,189.84, for dredging at Westfort Turning Basin. With application No. 333, accounts for dredging at Westfort Basin, to the amount of \$9,139.35, were submitted. This total of \$17,329.19 represents the work done at the Turning Basin to July 31, 1915.

The dredging of the Turning Basin consists of the removal of some 2,566,000 cubic yards of material, which at the prices of Contract 7339 would total over \$250,000.

The Public Works Act requires the award of contracts, over \$5,000, to the lowest tenderer, after public advertisement, except in cases of pressing emergency. No reason has been advanced for the inclusion of this work under Contract 7339, except that it adjoins the work of that contract, and that the terms are fair and reasonable.

The Turning Basin was not included in the plans submitted with Contract No. 7339, and should (we think) be classed as a new work. This office cannot see its way clear to paying for this work, unless the contract has been awarded in the manner prescribed by the Public Works Act.

Application No. 428 is returned herewith for revision. Please reduce the application by \$15,596.27 (\$17,329.19, less 10 per cent drawback).

I am, Sir, your obedient servant,

FREDERICK HAYTER, for A.G.

The Deputy Minister, Public Works Department.

PUBLIC WORKS DEPARTMENT, August 19, 1915.

SIR,—Replying to your letter of the 11th instant, referring to Application No. 428 for \$33,694.79, in favour of the Great Lakes Dredging Company, for dredging at Fort William, Ont., under Contract No. 7339, for the purpose of enlarging the Westfort Turning Basin, I beg to enclose for your information copy of a report from the Assistant Chief Engineer, which will inform you of the situation in regard to this work.

Referring especially to the fifth paragraph of your letter, I would say that there apparently exists a misapprehension in your mind with respect to the Turning Basin not having been included on the plan accompanying Contract No. 7339. To elucidate clearly the position of matters, there is attached a small sketch taken from the plan accompanying Contract No. 7339. It was at first intended to dredge the two areas in red—marked respectively "A" and "B"—but area "A" was abandoned on account of the excessive cost of acquiring this land, and the area marked "C", the excavation of which is now under discussion substituted for it. Area "B", the original Turning Basin (provided area "A" had been dredged away to widen the channel thereto), has already been dredged; and what the Order in Council of June 26, 1915, authorizes, is practically the substitution of area "C" for the abandoned area "A"; and this cannot really be said to be an extension of the contract, as the figures given in attached memorandum show that, while the yardage of area "C" is greater than area "A" the resultant cost of acquiring and dredging area "C" as against acquiring and dredging area "A" shows a very substantial saving to the Department, and at the same time provides a more commodious Turning Basin.

Under these circumstances, it seems to me that the authority secured by the Department for the performance of this work quite fully complies with the legal requirements; and, I trust, upon this explanation, you will see your way to pass the estimates already submitted, as well as future ones which will be rendered for the prosecution of this work.

I am, Sir, your obedient servant,
The Auditor General. J. B. HUNTER, D.M.

PUBLIC WORKS DEPARTMENT, August 19, 1915.

SIR,—I have the honour to submit the following report on the dredging of the Westfort Turning Basin at the head of navigation in the Kaministiquia River at Fort William, referred to in the letter of the 11th instant from the Auditor General.

Attached is a plan showing the area under consideration, and which has been taken from the plan accompanying and forming part of Contract No. 7339.

The areas tinted red on this plan were to be dredged over under this contract to give a depth of 25 feet at low water.

Under date of September 8, 1908, District Engineer Merrick in reporting on a request received by the Department for immediate attention to the dredging of a turning basin says: "The construction of this turning basin is part of the general scheme of improvement in connection with Fort William Harbour, a report on which with plans I forwarded to Chief Engineer on August 24.

"The area of land required from the Grand Trunk Pacific Railway for the construction of this Turning Basin is 13.43 acres."

This area tinted red and marked "Area B" in attached plan was acquired from the Grand Trunk Pacific Railway for a turning basin and has been dredged.

When expropriation proceedings were instituted to acquire area "A" shown tinted red on attached plan, and the dredging of which area formed part of the general scheme of improvements it was ascertained that very heavy damages would be incurred by the owners, for which the Department would have to pay.

After careful consideration an alternative plan was adopted, consisting in the acquisition of area "C" from the Grand Trunk Pacific, and abandoning the widening of the river at area "A". By doing so the Department secured a straight channel and more commodious turning basin for vessels at the head of the navigable part of the Kaministiquia River.

The estimated cost of the two schemes were:—

Original scheme:

Expropriation, land and damage compensation, approximately.....	\$288,775 50
Dredging required.....	52,097 25
	<hr/> \$340,872 75

Alternative scheme:

Dredging, 1,623,183 cubic yards.....	\$243,477 00
21 acres land to obtain from G.T.P.....	10,500 00
	<hr/> \$253,977 00

Estimated saving by adopting Alternative scheme.....	\$86,895 75
--	-------------

I am, Sir, your obedient servant,
A. R. DUFRESNE, Asst. Chief Engineer.
The Deputy Minister, Public Works Department.

(NOTE.—On receipt of this letter, application was released for payment.)

SESSIONAL PAPER No. 1

St. John Harbour Improvements: Norton Griffiths Co.

AUDITOR GENERAL'S OFFICE, Aug. 13, 1915.

SIR.—The Norton Griffiths Co. have a contract, with your Department, for the performance of certain works at Courtenay Bay, St. John, N.B.

This contract calls for the dredging of the Courtenay Bay basin, at a price of 24 cents per cubic yard, measured *in situ*. Part of the material is removed on scows; and, in this case, the place-measure is obtained by reducing the scow returns by five per cent.

Under section 57 of the specification, the following arrangement is made for the channel dredging: "should the successful tenderer elect to employ suction dredges on the channel work, the quantities of dredging shall be measured *in situ*, and an addition of 20 per cent will be paid him on the price mentioned in "his tender."

Why is this factor not employed in the calculations of place-measurement on the basin work?

I am, Sir, your obedient servant,

FREDERICK HAYTER, *for A. G.*

The Deputy Minister, Public Works Department.

PUBLIC WORKS DEPT., OTTAWA, Aug. 31, 1915.

SIR.—Referring to your letter of the 13th instant, in regard to the mode of calculation of measurement of dredging work performed by The Norton Griffiths Company under their Courtenay Bay, St. John, N.B., contract, I am directed to enclose, for your information copy of report received from our Superintending Engineer, Mr. Valiquet, containing the explanation desired by you on the subject.

I am, Sir, your obedient servant,

R. C. DESROCHERS, *Secretary.*

The Auditor General.

DEPARTMENT OF PUBLIC WORKS, OTTAWA, Aug. 30, 1915.

Memorandum for the Deputy Minister.

With reference to a letter dated August 13, herewith attached, from the Auditor General's Office, regarding measurements of dredging in Courtenay Bay, St. John, N.B., I beg to state that the five per cent reduction was only a temporary arrangement, owing to objection on the part of the Contractors and pending experiments with the material to ascertain the expansion.

I contended that ten per cent would be nearly the correct percentage, as the material was pumped into scows in a very compact mass.

Owing to silting, the measurements taken, to ascertain the percentage, could not be relied on. It has therefore been decided to apply clause 57 for the

deduction, but in this case, the percentage is to be obtained from the scow measurements instead of the *situ* measurements and should be $16\frac{2}{3}$ per cent instead of 20 per cent.

For the next progress estimate, instructions have been given to apply the $16\frac{2}{3}$ percentage to all the measurements given so far under the five per cent deduction, leaving the Contractors to prove that they have not received proper measurements.

U. VALIQUET, *Superintending Engineer.*

Manitoba Buildings: H. E. Matthews.

AUDIT OFFICE, August 13, 1915.

SIR,—Let me call your attention to the following accounts paid by your Department in the fiscal year 1914-15:—

R. 2864.....	\$1,750 00
R. 2954.....	2,875 00
R. 15293.....	4,402 50

These payments were made to H. E. Matthews for architectural plans for certain proposed public buildings in Manitoba.

The architect's address, on his bill head, is given as 302 Lindsay Building, Winnipeg. This is the office rented by your Department, for the use of the resident architect at Winnipeg.

Is the H. E. Matthews, to whom these payments have been made, the H. E. Matthews employed as the resident architect at Winnipeg?

I am, Sir, your obedient servant,

FREDERICK HAYTER, *for A. G.*

The Deputy Minister, Public Works Department.

PUBLIC WORKS DEPT., August 24, 1915.

SIR,—In reply to your letter of the 13th instant in which you refer to certain accounts that have been paid to Mr. H. E. Matthews, I have to inform you that on the 4th of June, 1912, Mr. H. E. Matthews, to whom these accounts were paid, was employed as Superintending Architect of Dominion Public Buildings in the Province of Manitoba. By order in Council of the 25th August, 1913, he was appointed to the third class of the professional branches of the Department of Public Works, Architect in Charge etc., outside service, at a salary of \$2,500 per annum. His duty is to see to all repairs, maintenance, etc., of the various Dominion public buildings in that province. He is not called upon to devote the whole of his time to departmental business. He is permitted to engage in private practice as an architect. As such private practitioner he prepared the architectural plans and did the work for which the payments mentioned were made. The rent of the offices occupied by him is not paid by this Department.

I am, Sir, your obedient servant,

A. ST. LAURENT, *Asst. D. M.*

The Auditor General.

SESSIONAL PAPER No. 1

Dredging at Honey Harbour: Wm. McClinchy.

AUDIT OFFICE, March 16, 1915.

SIR.—Let me call your attention to Application No. 1870 for \$854.44, in favour of Wm. McClinchy, being supplementary final estimate for dredging at Honey Harbour, Ont. The account is for an additional allowance of \$2 per cubic yard on quantity dredged during 1914.

The work at Honey Harbour was performed under agreement (as mentioned in a letter of May 12, 1914, from the Asst. Chief Engineer to the Acting Engineer for the Midland District). This letter states "the Department has authorized the acceptance of the offer of Wm. McClinchy to effect the removal of rock obstructing the channel between Roberts Island and Little Beausoleil at Honey Harbour. . . . The rate of payment for this work is \$6 per cubic yard, place measurement."

Please furnish this office with a copy of your file, showing Wm. McClinchy's offer, the agreement under which the work was performed, and the correspondence in relation to the increase in price to \$8 per cubic yard.

I am, Sir, your obedient servant,

FREDERICK HAYTER, for A.G.

The Deputy Minister, Public Works Department.

PUBLIC WORKS DEPARTMENT, March 23, 1915.

SIR.—In reply to your letter of the 16th instant, regarding Application No. 1870 for \$854.44, in favour of William McClinchy, for dredging at Honey Harbour, Ont., and asking to be furnished with a copy of this Department's file showing Mr. McClinchy's offer, the agreement under which the work was performed, and the correspondence in relation to increase in price to \$8 per cubic yard, I now have the honour to enclose copies of the documents requested.

I am, Sir, your obedient servant,

J. B. HUNTER, D.M.

The Auditor General.

OTTAWA, March 22, 1915.

Memorandum for the Deputy Minister.

Referring to attached letter of the 16th instant, from the Auditor General, regarding additional allowance of \$2 per cubic yard for dredging under private agreement with Mr. Wm. McClinchy, Honey Harbour, Ont., I attach herewith copy of offer from Mr. McClinchy to do this work for \$6 per cubic yard. The original is on file 4444 herewith.

As regards correspondence in relation to the increase in price, kindly note in file herewith letter from the Chief Engineer of February 5 last to Mr. Armstrong, and reply of his of February 12 last, with statement of expenditure on this work.

Verbal instructions were received by me on the 2nd instant from the Honourable the Minister to pay \$2 extra per cubic yard for this work, and I attach copy of confirmation of this to the Honourable the Minister of the same date.

A. R. DUFRESNE, *Asst. Chief Engineer.*

MIDLAND, May 4, 1914.

SIR,—I would beg to make the following offer for clearing a channel between Roberts' Island and Little Beausoleil Island, which I understand is all rock, and which necessitates the removal of 450 cubic yards of that material approximately, this offer to do at a price of \$6 per cubic yard in place measurement.

WM. MCCLINCHY.

Frank Moberly, Esq., Act. Dist. Engineer, Midland.

DISTRICT ENGINEER'S OFFICE, MIDLAND, May 4, 1914.

DEAR SIR,—In accordance with your verbal instructions given me while in Ottawa, I have obtained the enclosed offer from Mr. William McClinchy to perform work required in opening the channel between Roberts Island and Little Beausoleil Island, at the rate of \$6 per cubic yard of rock in place measurement.

Mr. Duff is anxious to have this work performed as soon as possible.

Yours obediently,

FRANK MOBERLY, *Act. Dist. Engineer.*

The Asst. Chief Engineer, Public Works Department.

ASSISTANT CHIEF ENGINEER'S OFFICE, OTTAWA, May 7, 1914.

SIR,—Acting District Engineer Moberly, with his letter of the 4th instant, transmits an offer from William McClinchy, of Midland, to effect the removal of rock in the channel between Robert's Island and Little Beausoleil Island, Honey Harbour, Ontario.

To effect the removal of the 450 cubic yards, place measurement, of solid rock would, at the rate offered by Mr. McClinchy—namely, \$6 per cubic yard place measurement, class "A" material—, involve an expenditure of \$2,700, chargeable to the appropriation "Dredging, Ontario and Quebec".

I can consider this price to be reasonable, and would recommend the acceptance of the same, that the work may be undertaken and completed as soon as possible.

I have the honour to be, Sir, your obedient servant,

A. R. DUFRESNE, *Asst. Chief Engineer.*

The Deputy Minister, Public Works Dept.

SESSIONAL PAPER No. 1

PUBLIC WORKS DEPARTMENT, OTTAWA, May 12, 1914.

To Actg. District Engineer, Midland.

Department accepts McClinchy offer Honey Harbour dredging contained your fourth instant. Notify contractor, lay out work, appoint necessary Inspector, put under way immediately. Letter follows.

(Sgd.) A. R. DUFRESNE.

PUBLIC WORKS DEPT., May 12, 1914.

DEAR SIR,—In further confirmation of my telegram of even date, I beg to advise you that the Department has authorized the acceptance of the offer of William McClinchy, of Midland, to effect the removal of rock obstructing the channel between Roberts Island and Little Beausoleil Island, Honey Harbour, Ont.

The work involved in this authorization comprises the removal of a quantity not to exceed 450 cubic yards, place measurement, of solid rock. The rate of payment for this work is \$6 per cubic yard, place measurement, class "A" material; involving an expenditure of \$2,700, chargeable to the appropriation "Dredging, Ontario and Quebec".

You will note particularly that the work is so laid out that the improvement desired will be effected by the expenditure of the above amount.

You will have the work laid out, and visited sufficiently often by yourself and assistant engineers, that the Department may have assurance of the proper execution of the work. You will arrange for the appointment of a competent Inspector to supervise the work, and to whom you will give full and explicit instructions concerning the nature of his duties in connection therewith.

On completion of the work, final estimate, together with statement as outlined in my circular letter 33 of 22nd July, 1913, should be forwarded; followed as reasonably convenient thereafter, with the plans, cross sections, and calculations on which the final estimate is based.

You will kindly bear in mind the necessity of forwarding on completion the work, or as soon thereafter as practicable, the information concerning the work as outlined by my circular letter *re* Aids to Navigation.

Kindly acknowledge receipt of this letter, advising when work is expected to commence.

Yours very truly,

A. R. DUFRESNE, *Assistant Chief Engineer.*

Frank Moberly, Esq., Act. Dist. Engineer, Midland.

DISTRICT ENGINEER'S OFFICE, MIDLAND, May 13, 1914.

DEAR SIR,—In accordance with instructions conveyed in your telegram of May 12, I notified McClinchy that his offer for dredging at Honey Harbour has been accepted. Have also appointed W. H. McArdie as Inspector and have work laid out, which will be proceeded with immediately.

Yours obediently,

FRANK MOBERLY, *Actg. Dist. Engineer.*

The Asst. Chief Engineer, Public Works Dept.

February 5, 1915.

SIR,—With reference to your letter of October 23 last, enclosing final estimate in connection with the dredging performed by Mr. Wm. McClinchy at Honey Harbour, Ont., will you kindly take up with the contractor the question of the disbursements made by him while performing this work.

Yours obediently,

E. D. LAFLEUR, *Chief Engineer.*

J. H. Armstrong, Esq., District Engineer, Midland.

MIDLAND, February 12, 1915.

SIR,—With further reference to your letter of February 5, I now beg to advise that I have taken up with the contractor, Mr. Wm. McClinchy, the question of disbursements made by him while performing this work, and now enclose to you a statement of same.

Yours truly,

J. H. ARMSTRONG, *Dist. Engineer.*

The Chief Engineer, Public Works Department.

SUMMARY OF DISBURSEMENTS.

Page No. 1—Amount of Accounts paid	\$1,318.01
Page No. 2—Amount of Wages paid	1,596.94
	<u>\$2,914.95</u>

I hereby certify that the above mentioned amount of disbursements were incurred by me in the carrying out of my contract for the removal of solid rock at "Big Dog Channel," Honey Harbour.

WM. McCLINCHY, *Contractor.*

The amount of disbursements, as set forth above, \$2,914.95, was compiled from the accounts and payrolls submitted to me by Mr. Wm. McClinchy.

J. H. ARMSTRONG, *District Engineer.*

MIDLAND, February 11, 1915.

AUDIT OFFICE, April 29, 1915.

SIR,—I beg to acknowledge the receipt of your letter of the 23rd instant, regarding Application No. 1870 for \$854.44, in favour of Wm. McClinchy, for dredging at Honey Harbour, Ont.

Mr. McClinchy offered to remove about four hundred and fifty cubic yards rock at \$6 per cubic yard, place measurement. The Department accepted this offer. The work was completed and the contractor was paid in full at his tendered price.

Subsequently, it was shown, that the contractor had performed the work at a loss. The application at hand offers him full compensation for his outlay and a profit on that outlay of about 17 per cent.

We regret that the Audit Office is unable to certify more than the contract price, namely, 450 yards at \$6, or \$2,700, which was fixed by the contractor in his tender.

I am, Sir, your obedient servant,

FREDERICK HAYTER, for A.G.

The Deputy Minister, Public Works Department.

Laprairie Protection Piers: Duranceau & Poupart.

AUDIT OFFICE, November 18, 1915.

SIR,—I enclose herewith a statement in connection with the Laprairie Protection Dyke, Duranceau & Poupart, Contractors, showing estimated quantities as compared with actual results and have to request that you will let me have an explanation from your engineers as to why these results are so much in excess of the estimate.

I am, Sir, your obedient servant,

J. FRASER, A.G.

The Deputy Minister, Public Works Department.

Laprairie Protection Dyke, Duranceau & Poupart, Contractors.

SESSIONAL PAPER No. 1

DEPARTMENT OF PUBLIC WORKS,

OTTAWA, November 30, 1915.

SIR,—With further reference to your letter of November 18 instant, I send you enclosed copy of a report dated November 24, from Mr. J. L. Dansereau, Acting District Engineer at Montreal, from which you will see that Mr. Paul Paradis, Assistant Engineer, made an error in calculating the quantities of earth filling and stone rip-rap on which this contract was based. This explains the excess of the quantities of these materials as returned in the Progress Estimates over the quantities as originally estimated. I may say that Mr. Paradis is no longer in the service of the Department.

I have the honour to be, Sir, your obedient servant,

R. C. DESROCHERS, *Secretary*.

The Auditor General.

DISTRICT ENGINEER'S OFFICE,

MONTREAL, November 24, 1915.

DEAR SIR,—I acknowledge receipt of your letter No. 5622 of the 23rd inst., stating that the Department was in receipt of a communication from the Auditor General, enclosing a statement in connection with the Laprairie Protection Dyke, showing the estimated quantities as compared with actual results, and requesting an explanation as to why the results are so much in excess of the estimates.

In compliance with your request that I report fully in regard to this matter, I beg to give you the following explanations: The quantities for the earth filling and stone rip-rap forwarded to you, on July the 7th, were arrived at by establishing the difference between the quantities shown by a survey which was made before the work started, and a survey which was made recently.

This last survey shows that the earth filling and stone rip-rap were done to the elevation and with the dimensions called by the specifications.

The difference between the estimated quantities and the actual results is due to an error in the calculation of the estimated quantities.

Mr. J. L. Michaud, the late District Engineer, has already reported in his letter No. 648 of December the 5th, 1914, to Mr. J. M. Chalifour, Auditor, Chief Engineer's Branch, that Mr. Paul Paradis, the engineer in charge of the work at Laprairie, had made an error in calculating the quantities on which was based the contract awarded to Messrs. Duranceau and Poupart.

In this same letter Mr. Michaud stated also that the quantities of earth filling would amount to 34,500 cubic yards, and that the stone rip-rap would come up to a little over 22,000 square yards.

Subsequently, I had the survey and level taken by Mr. Paul Paradis before the contractors started to do any work on the dyke accurately plotted, and the plan, thus obtained, compared with the actual plan of the dyke, gave the quantities of earth filling and stone rip-rap shown in estimate No. 11 forwarded to you on July 7 last.

I enclose herewith, copy of the correspondence which Mr. J. L. Michaud had with Mr. J. M. Chalifour regarding the matter.

Your obedient servant,

J. LUCIAN DANSEREAU, *Actg. Dist. Engineer*.

The Chief Engineer, Public Works Department.

Fraser River Dredging: Moore & Pethick.

AUDITOR GENERAL'S OFFICE, OTTAWA, June 9, 1915.

SIR,—Let me call your attention to Application No. 167, in favour of Moore & Pethick, for \$5,064.39, being for estimate No. one to April 30, for dredging at Nicomen, McDonald's Bar, Fraser River, B.C.

According to the papers supplied, this dredging is performed under agreement, authorized by a letter from the Chief Engineer, dated March 12, 1915. The agreement calls for the removal of 245,000 cubic yards of material at 15 cents per cubic yard.

To what degree was public competition sought on this work?

Has authority been obtained from Council for the expenditure?

I am, Sir, your obedient servant,

F. HAYTER, *for A. G.*

The Deputy Minister, Public Works Dept.

DEPARTMENT OF PUBLIC WORKS, OTTAWA, June 17, 1915.

SIR,—In reply to your letter of the 9th instant, calling attention to Application No. 167, in favour of Moore & Pethick, for \$5,064.39, being for estimate No. 1 to April 30, for dredging at Nicomen, McDonald's Bar, Fraser River, B.C., I beg to state that there was no public competition for this work, the circumstances being such that it was considered advisable to make an arrangement with Moore & Pethick as recommended by District Engineer Worsfold in his report of January 8, 1915, a copy of which I enclose.

No recommendation was made to Council in the matter.

I have the honour to be, Sir, your obedient servant,

L. H. COLMAN, *Asst. Sec'y.*

The Auditor General.

NEW WESTMINSTER, B.C., January 8, 1915.

SIR,—I have received a letter from Mr. Nelson, Superintendent of Dredges in which he says that he does not expect that the dredge "King Edward" which is working at Nicomen will be able to operate much longer on account of the material being very heavy, and the height to which it has to be lifted.

Having this fact in view, and on account of the urgency of the work, which should be completed before the river begins to rise, I have to suggest another method of making this cut.

The most economical way would be to do this with Bagley scrapers, probably supplemented with a steam shovel and cars.

The original estimate of amount of material was 300,000 cubic yards, but I find that since then, on account of the river having deposited more material on the bar, the amount to be removed to cut a channel to lowest water mark is 245,000 cubic yards; but if this is removed by the dredge, the quantity would be 426,000 cubic yards, as the dredge would have to cut about 8 ft. lower to allow for flotation at all stages of the water.

SESSIONAL PAPER No. 1

The Department has not the plant to do this work except with the dredge, and it could be hired, but it would be much more satisfactory if it could be arranged to do this work by contract or on a force account.

There is a firm, Moore & Pethick, who have a suitable plant, who would undertake this work on a force account, with a guarantee that it would not cost over 15c. per cubic yard, which is cheaper than can be done by the dredge *King Edward* and it would not be necessary to remove so much material. The wear and tear on the dredge working on this material is very heavy, and I have no doubt that if it can be arranged to let Moore & Pethick do this work the Government will save considerable money on this work, as the dredge *King Edward* with the double crew, would take about seven months work at least to complete it, and the dredge before that time would be almost sure to require very extensive repairs. The cost of the dredge amounts to about \$5,500 per month for operating expenses, which would be about \$38,500 without repairs if it were possible to do it, but as Mr. Nelson says he does not think that it will be possible to do it on account of the heavy material and elevation.

I would, therefore, on account of the urgency of this work, respectfully recommend that some arrangement be entered into with Messrs. Moore & Pethick to undertake this work as they are a very reliable firm, who have all the necessary plant and would guarantee to complete the work by May 1, at a cost of not more than 15c. per cubic yard.

Yours obediently,

C. C. WORSFOLD, *Dist. Engineer.*

The Chief Engineer, Ottawa.

AUDITOR GENERAL'S OFFICE, OTTAWA, July 20, 1915.

SIR,—I beg to acknowledge the receipt of your Assistant Secretary's letter of the 17th ultimo, in reference to a payment of \$5,064.39 to Moore & Pethick for work at Nicomen, Fraser River, B.C.

The letter states that there was no public competition, on account of the urgency of the work, and that no recommendation was made to Council.

The argument of urgency is put forward by the District Engineer at New Westminster, and is supported by the Chief Engineer. Does the Department, as a whole, endorse the opinion of these Engineers?

When a contract is awarded after public competition, an order-in-council is considered necessary. When competition has been dispensed with, sanction of Council seems even more desirable. We would prefer to have such sanction, before proceeding to certify this account.

In cases where tenders have not been sought, it is customary for the accounts to bear the certificate "prices fair and just." This certificate has been omitted in the present case.

I am, Sir, your obedient servant,

F. HAYTER, *for A. G.*

The Deputy Minister, Public Works Dept.

DEPARTMENT OF PUBLIC WORKS, OTTAWA, July 21, 1915.

SIR,—Replying to your favour of the 20th instant, regarding dredging in the Fraser River at Nicomen, B.C., by Messrs. Moore & Pethick, I beg to say that a recommendation to Council has been prepared setting out the urgency connected with the performance of this work, which will no doubt reach you as soon as it passes Council. It will, I think, enable you to pass payment for this work in accordance with the provisions of the Public Works Act.

The accounts will be certified, as you request, prices fair and just.

Your obedient servant,

J. B. HUNTER, D.M.

The Auditor General.

Order in Council, 27th July, 1915.—The Committee of the Privy Council have had before them a Report, dated 21st July, 1915, from the Acting Minister of Public Works, submitting that the Fraser River has recently been making serious inroads against the shore line of Nicomen Island. In several places the dyke parallelling the river is seriously threatened. Work was performed during the winter in an endeavour to check this undermining action against the Island by brush and rock riprap. Still the undermining continued, and it was decided to commence the dredging of a new channel opposite Nicomen Island through McDonald's Bar for the purpose of diverting the channel in part and thereby relieve the pressure of water against Nicomen Island. It was seen about January 1, that Dredge *King Edward* could not do this work by the time of high water which is due about the end of May, for the reason that there was too much of the bar above water.

The Minister states that the District Engineer of the Department of Public Works at New Westminster, B.C., under date 8th January, 1915, reported as follows to the Chief Engineer regarding the dredging in question, viz.:—

"I have received a letter from Mr. Nelson, Superintendent of Dredges, in which he says that he does not expect that the Dredge *King Edward*, which is working at Nicomen, will be able to operate much longer on account of the material being very heavy, and the height to which it has to be lifted.

"Having this fact in view, and on account of the urgency of the work, which should be completed before the river begins to rise, I have to suggest another method of making this cut.

"The most economical way would be to do this with Bagley scrapers, probably supplemented with a steam shovel and cars.

"The original estimate of amount of material was 300,000 cubic yards but I find that since then, on account of the river having deposited more material on the bar, the amount to be removed to cut a channel to lowest water mark is 245,000 cubic yards; but if this is removed by the dredge, the quantity would be 426,000 cubic yards, as the dredge would have to cut about 8 feet lower to allow for flotation at all stages of the water.

"The Department has not the plant to do this work except with a dredge and it could be hired, but it would be much more satisfactory if it could be arranged to do this work by contract or on a force account.

"There is a firm, Moore & Pethick, who have a suitable plant, who would undertake this work on a force account, with a guarantee that it would not cost over 15 cents per cubic yard, which is cheaper than can be done by the Dredge *King Edward*, and it would not be necessary to remove so much

SESSIONAL PAPER No. 1

"material. The wear and tear on the dredge working on this material is very heavy, and I have no doubt that if it can be arranged to let Moore & Pethick do this work, the Government will save considerable money on this work, as the Dredge *King Edward*, with the double crew, would take about seven months' work at least to complete it, and the dredge before that time would be almost sure to require very extensive repairs. The cost of the dredge amounts to about \$5,500 per month for operating expenses, which would be about \$38,500 without repairs, if it were possible to do it, but as Mr. Nelson says, he does not think that it will be possible to do it on account of the heavy material and elevation.

"I would therefore, on account of the urgency of this work, respectfully recommend that some arrangement be entered into with Messrs. Moore & Pethick to undertake this work, as they are a very reliable firm, who have all the necessary plant and would guarantee to complete the work by 1st May, at a cost of not more than 15 cents per cubic yard."

The Minister further states that the Chief Engineer of the Department of Public Works, in transmitting the above quoted report, on 16th January, 1915, reported as follows:—

"Mr. Worsfold states that the Dredge *King Edward* will not be able to operate much longer on account of the material being very heavy and the height to which it has to be lifted. The District Engineer reports that the most economical way to do this work before the river begins to rise would be to employ Bagley scrapers, with a steam shovel and cars. He further reports that Messrs. Moore & Pethick, who have a suitable plant, are ready to undertake this work with a guarantee that it will not cost more than 15 cents per cubic yard, which is cheaper than can be done with the dredge. I would recommend that this work be undertaken and that an agreement be entered into with Messrs. Moore & Pethick as outlined in Mr. Worsfold's report."

That, in the anticipation that this excavation could be performed by the Departmental plant, Dredge *King Edward* was kept at work on it up to March 27, 1915, when it was finally realised that it was impossible to make sufficient progress with it before high water, which might cause further damage to Nicomen Island;

That it was therefore urgent that the work should be completed, or at least sufficient progress made thereon, before high water, and as it was considered that there was not sufficient time to call for public tenders, and award a contract for the performance of this work, before high water, which usually occurs on the Fraser River about May 24, and, further, in view of the fact that Messrs. Moore & Pethick are the owners of a suitable plant enabling them to perform the major part of the work before such high water, it was deemed advisable to proceed under Sub-section (a) of Section 36 of the Public Works Act, which authorizes the Minister having charge of a public department to dispense with the calling for tenders in case "of pressing emergency in which delay would be injurious to the public interest";

That, in view of the above, the Chief Engineer of the Department of Public Works, on March 12, 1915, sent the following letter of instructions to the District Engineer:—

"With reference to your report of January 8, last, regarding certain improvements desired at Nicomen, on the Fraser River, B.C., you are hereby authorized to enter into an agreement with Messrs. Moore & Pethick for the removal of the 245,000 cubic yards of material at a cost not to exceed 15 cents per cubic yard. Kindly forward the agreement here."

That, under the above instructions, the District Engineer of the Department of Public Works had Messrs. Moore & Pethick execute an agreement for the performance of the work;

That the work of excavation has since been proceeded with in good faith by the Contractors.

The Minister, in view of the circumstances above cited, recommends that authority be granted to confirm the action of the Department of Public Works:—

- 1.—In dispensing, under Sub-section (a) of Section 36 of the Public Works Act, with calling for public tenders for the performance of the dredging in the Fraser River, at Nicomen, B.C., entailing the removal of about 245,000 cubic yards, and
- 2.—In entering into an agreement with Messrs. Moore & Pethick, of Victoria, B.C., for the execution of the above work, at 15 cents per cubic yard, place measurement, which is a fair and reasonable price.

The Committee submit the same for approval:

RODOLPHE BOUDREAU, *C. P. C.*

Port Arthur Drill Hall: Tharle, Brown & Stewart.

AUDITOR GENERAL'S OFFICE, OTTAWA, June 2, 1915.

SIR,—On April 30, application was made by your Department for the payment of \$15,874.30 to Tharle, Brown & Stewart, for extra work on contract 9360, for the construction of Port Arthur Drill Hall.

At that time, it was stated that sanction of Council for these accounts would be obtained and forwarded within a few days. The application was sent in advance for the purpose of examination by this office, in order that payment might be included in the fiscal year 1914-15.

As yet the Order in Council in reference to these Extras has not been received. Would you have a copy mailed to this office, in order that the payment may be certified before the close of the year.

I understand that it is the intention to close the accounts within a few days.

I am, Sir, your obedient servant,

F. HAYTER, for A.G.

The Deputy Minister, Public Works Department.

PUBLIC WORKS DEPARTMENT, June 5, 1915.

SIR,—Replying to your favour of the 2nd instant, I beg to say that, before making a recommendation to Council for payment of \$15,874.30 for extras, to Messrs. Tharle, Brown and Stewart, in connection with Contract No. 9360, for the construction of Port Arthur Drill Hall, it was deemed advisable to first write them and ascertain definitely whether they would accept this amount in full and final settlement of their claim. The contractors' solicitors was written to on May 20, 1915, but no reply has yet been received.

I am to-day writing the solicitor again, forwarding him a copy of your letter and impressing upon him the urgency of an immediate answer.

Your obedient servant,

J. B. HUNTER, *D.M.*

The Auditor General.

SESSIONAL PAPER No. 1

Hamilton Harbour: Hennessy, Poupore, Dwyer & Taylor.

AUDIT OFFICE, November 18, 1915.

SIR,—I enclose herewith a statement in connection with the Hamilton, Ont., Wharf, Hennessy, Poupore, Dwyer & Taylor, Contractors, showing estimated quantities as compared with actual results and have to request that you will let me have an explanation from your Engineers as to why these results are so much in excess of the estimate.

I am, Sir, your obedient servant,

J. FRASER, A.G.

The Deputy Minister, Public Works Department.

Hamilton, Ont., Wharf.

HENNESSY, POUPORE, DWYER & TAYLOR, Contractors.

ITEMS IN EXCESS OF ESTIMATED QUANTITIES.

No. 1—Dredging place-measurement at 24c. per cubic yard—

Estimated.....	298,000 cubic yds
Dredging to October 31, 1915.....	413,291 “

No. 8—Interlocking and steel-piling at 3.7c. per lb.—

Estimated.....	1,233,833 lbs.
In the work October 31, 1915.....	1,281,000 “

No. 11—Wrt. iron plates, straps, etc., at 6c. per lb.—

Estimated.....	18,590 lbs.
In work Oct. 31, 1915.....	30,006 “

No. 15—Machine bolts with nuts, etc., at 5.5c. per lb.—

Estimated.....	68,318 lbs.
In work October 31, 1915.....	78,821 “

DEPARTMENT OF PUBLIC WORKS,

OTTAWA, December 14, 1915.

SIR,—Referring further to your letter of November 18 last, regarding the excess in the amount of dredging and the quantities of certain materials used for this work over the amount and quantities as given in the Engineers' estimate, I send you herewith one copy each of the following reports:—

September 16, 1915, from J. M. Wilson, District Engineer.

September 29, 1915, from J. M. Wilson, District Engineer.

December 7, 1915, from Chief Engineer, with attached copy of District Engineer's report of December 6.

I have the honour to be, Sir, your obedient servant,

R. C. DESROCHERS, Sec'y.

The Auditor General.

DISTRICT ENGINEER'S OFFICE, TORONTO, September 16, 1915.

SIR,—I respectfully acknowledge receipt of your letter No. 4058, dated the 11th instant, acknowledging receipt of my letter of the 7th instant regarding the extra filling required for the grading of Ferguson Avenue at Hamilton, Ont., and asking to be advised as to the total amount of dredging involved in the contract with the Ottawa Contractors, Limited; also calling attention to your understanding that the total amount of material involved is 448,291 cubic yards, of which 363,291 cubic yards have already been returned on progress estimates, while in the contract the approximate total amount is stated to be 298,000 cubic yards; also asking to be advised as to this and the surplus material which will remain when the filling has been fully completed.

The amount of dredging returned by Mr. Irwin previous to handing his cross sections over to Mr. Molesworth is approximately 3,000 cubic yards short of the actual amount done as figured from the cross sections. This 3,000 cubic yards, added to the June returns, would make 311,291 cubic yards. At that time there remained to be excavated approximately 130,000 cubic yards, making a total to be excavated of 441,291 cubic yards.

Of this 130,000 cubic yards to be removed this season, 77,000 cubic yards were removed by September 15, and 18,000 cubic yards more will complete the area to the east of the-sewer outlet. This will leave a surplus of approximately 35,000 cubic yards to be disposed of.

Yours obediently,

J. M. WILSON, *Dist. Engineer.*

The Chief Engineer, Public Works Department.

DISTRICT ENGINEER'S OFFICE, TORONTO, September 29, 1915.

SIR,—I respectfully acknowledge receipt of your letter No. 4165, dated the 17th instant, acknowledging receipt of my report of the 16th instant regarding the extra filling required for the grading of Ferguson Avenue at Hamilton, Ont., and pointing out that the dredging performed to date is so much in excess of that shown on the contract plans and as given in the schedule of quantities that you asked to be advised if the dredging has been carried on to a greater depth than that shown on the contract plan; also asking whether or not it would be advantageous for the Department to stop the dredging as soon as sufficient material has been secured for the filling, thereby reducing the total quantity of dredging by 35,000 cubic yards.

The dredging has not been carried on to any greater depth than shown on the contract plans. The original estimate of 298,000 cubic yards must have been very approximate if no more soundings were available than are shown on the plan accompanying the contract and specifications. It would be very difficult to make a correct estimate as on the east side of the wall running past the Victoria Yacht Club, soundings are only shown for about half the distance, and only two lines of soundings across a width of 600 feet. The south half of this area does not show any soundings and it was on this half that the water was very shallow, averaging from about six inches to two feet.

I would recommend that authority be given to stop dredging operations at once as, with the exception of what is known as the Jutten property, the area to be filled is up to the level of the wall and the depositing of further material in this area will result in a large quantity finding its way back into the bay.

SESSIONAL PAPER No. 1

If the Jutten claim can be finally disposed of, it would be well to have that section of the area filled up, but if this is impossible, I would recommend that dredging operations be stopped immediately.

I am, Sir, yours obediently,

J. M. WILSON, *Dist. Engineer.*

The Chief Engineer, Public Works Department.

OTTAWA, December 7, 1915.

SIR,—In compliance with the instructions in the attached file 151-2B, I beg to transmit herewith a report from Mr. District Engineer J. M. Wilson with reference to the excess in the actual quantities as compared with the estimated quantities given in the contract with the Ottawa Contractors for certain improvements at Hamilton, Ont.

With reference to Item No. 1, I would refer you to Mr. Wilson's report of September 29 last, wherein it is shown that an error was made when compiling the original estimate of yardage.

With reference to Item No. 8, interlocking and steel piling, you will remember that the Department authorized a change from the original design, Lackawanna steel piling being substituted for Hunter material, and the increase is largely due to the reinforcing which was authorized by Order in Council of January 5, 1915.

With reference to Item No. 11, wrought iron plates, straps, etc., the District Engineer reports that this item includes 9,959 pounds for 866 feet of 8 inch channel bar at $11\frac{1}{4}$ pounds per foot. This channel bar was used as a capping for the Lackawanna steel piling, and while a 10 inch channel at 20 pounds was originally intended for the Hunter piling, the weight of it was included with the estimate for steel piling. This material has been returned under Item No. 11, but it is the intention to return it under Item No. 8. When these items are adjusted on the last progress estimate the other discrepancies, under Item No. 11, can only be accounted for by a variation of the original estimate and the actual conditions of the ground.

Concerning Item No. 15, machine bolts, nuts, etc., please note that on July 7, 1914, the Resident Engineer on the work ordered the contractors to place tie bolts between the steel piling and the steel concrete deck beams. This extra bolting amounted to 6,075 pounds.

You will please note that Mr. W. E. Irwin was the Resident Engineer during the greater part of this work and that Mr. J. G. Sing was the District Engineer. As you are aware the services of Mr. Irwin were dispensed with in November, 1914, and Mr. Sing resigned from the Department about the same time.

I am, Sir, your obedient servant,

EUG. D. LAFLEUR, *Chief Engineer.*

The Deputy Minister, Public Works Department

TORONTO, December 6, 1915.

SIR,—I respectfully acknowledge receipt of your letter 5693, dated the 25th ultimo, enclosing copy of a communication from the Auditor General attaching a statement in connection with the Hamilton, Ont., Wharf (Hennessy, Poupore, Dwyer & Taylor, Contractors), showing the estimated quantities as compared with actual results, and requesting an explanation as to why the results are so much in excess of the estimate; also asking that I bear in mind when reporting all the extra work authorized.

Item No. 1 in the Auditor General's statement, dealing with excess dredging, was explained in my letter No. 3739, dated September 29, the error being in the original estimate of yardage. In your letter 5520, dated November 17, you authorized dredging operations to be continued until all the dredging shown on the contract plan had been completed. The yardage returned to October 31 is not in excess of the quantity named in my letter above referred to.

In connection with Item No. 8, for interlocking steel piling, a change was made from the original design, Lackawanna steel piling being substituted for Hunter material. This change was authorized by your letter 3143, dated June 19, 1913. The total quantity of steel sheet piling driven in the work is 1,333,200 pounds, made up as follows:—

623 pieces, 30 feet long.....	18,690 feet.
87 " 40 "	3,480 "
giving a total of 22,170 ft. at 60 lbs. per ft.....	1,330,200 lbs.
special key piling for corner.....	3,000 "
Total.....	1,333,200 "

The weight of steel piling at 60 pounds per lineal foot was agreed to by Mr. Sing by letter 6518, dated July 8, 1913, and addressed to the Ottawa Contractors. Out of this weight mentioned above 52,200 pounds is charged under extra work and authorized by your letter 8779, dated September 1, 1913, and your telegram of the 17th of August, 1914, leaving 1,281,000 pounds in contract work. The difference between this quantity and the original estimate will be still greater when an item of 9,959 pounds for channel bars, at present included under Item 11, is transferred to Item No. 8. I have checked over the original manuscript estimate in this office and find that the weight of steel as estimated does not correspond with the original contract drawings. The Engineer, who prepared the original estimate, made a certain deduction from his total weight of steel for certain portions of Hunter piling that he claims Mr. Sing intended to eliminate. The estimate was reduced accordingly, but the contract plan was not changed to meet the altered conditions. If the dimensions on the contract plan are taken, and the weight of Lackawanna piling required, figured theoretically, it will be found that the result is considerably less than the weight of material actually driven. This is accounted for by the impossibility of driving the piles so as to cover a maximum area. A slight irregularity of line or a looseness of a joint would account for several piles in the total length of 866 feet of wall. By actual count there were the number of piles driven that are recorded above.

Item No. 11 for wrought iron plates, straps, etc., includes 9,959 pounds for 866 feet of 8 inch channel bar at $11\frac{1}{4}$ pounds per foot. This channel bar was used as a capping for the Lackawanna steel piling, and while a 10 inch channel at 20 pounds was originally intended for the Hunter piling, the weight of it was included with the estimate for steel piling. This item was formerly returned at

SESSIONAL PAPER No. 1

6 cents per pound, but I think it should go in at the 3·7 cent rate, and will forward it under that heading in the next estimate unless otherwise instructed. This would largely account for the difference returned for Item No. 11. Any other discrepancies in this item can only be accounted for by a variation of the original estimate and actual conditions on the ground.

Item No. 15, for machine bolts, nuts, etc., is larger than the estimated weight for two reasons: Mr. Assistant Irwin, by letter dated July 7, 1914, ordered the Ottawa Contractors to place tie bolts between the steel piling and the steel concrete deck beams as ordered, and the total weight of bolts so ordered was 6,075 pounds. Any further difference between the actual results and the estimated quantity must be accounted for by the bolts actually weighing more than estimated.

All the work on which a report is asked, with the exception of the dredging was practically completed under the supervision of Mr. Sing and Mr. Irwin, and it is a difficult matter to account satisfactorily at this stage of the work for the discrepancies noted.

I am, Sir, yours obediently,

J. M. WILSON, *Dist. Engineer.*

The Chief Engineer, Public Works Department.

Victoria Harbour Wharves: Grant, Smith & Co. & McDonnell.

AUDIT OFFICE, November 15, 1915.

SIR,—In a contract dated 9th March, 1914, with Grant, Smith & Company and Macdonnell, Ltd., Section 36 gives as approximate quantities the following:

1. Earth excavation measured in place..... 47,600 cu. yd. at \$0.52
2. Rock excavation measured in place..... 4,300 cu. yd. at \$9.10

In progress estimate No. 14 for work done to 30th September, 1915, I find your engineer has certified to the following quantities:

1. Earth excavation..... 31,940 cu. yd.
2. Rock excavation..... 20,183 cu. yd., and
 Rock blasted, but not excavated, 50%..... 5,105 cu. yd., making
 a total of rock to this date of..... 25,288 cu. yd., or an
 excess of rock over estimate of..... 20,988 cu. yd. at
 \$9.10 per cu. yd. This excess amounts to the enormous sum of
 \$190,990.

Before passing any further estimates, I have to request that you will explain the manner in which the estimate of 4,300 cu. yd. was arrived at. It hardly seems possible that experienced engineers, such as you have in your department could make such a serious mistake, and as the amount involved is so large, I think you should have the matter investigated at the earliest possible date.

I understand that Mr. Valiquet of your department has been in Victoria looking into the matter and have to request that you will be good enough to send me a copy of his report.

Awaiting an early reply,

I am, Sir, your obedient servant.

J. FRASER, A.G.

The Deputy Minister of Public Works.

AUDIT OFFICE, December 1, 1915.

SIR,—I beg to acknowledge receipt of your application No. 800 for \$65,650, in favour of Grant, Smith & Co. & McDonnell, Ltd., being for estimate No. 18 to October 31, for Victoria, B.C., Wharves.

On November 15, 1915, a letter was sent you, requesting that a copy of Mr. Valiquet's report, dealing with this contract, be sent to this office. Application No. 800 is held pending the receipt of this report.

I am, Sir, your obedient servant,

FREDERICK HAYTER, for A.G.

The Deputy Minister Public Works.

DEPARTMENT OF PUBLIC WORKS,

OTTAWA, December 21, 1915.

SIR,—Referring to your letters of November 15 and December 1, 1915, *re* Contract for Wharves, Victoria Harbour, B.C., No. 9969, in which you point out that the quantities of rock returned in progress estimates exceed the approximate quantity mentioned in the contract, I beg to say that the Chief Engineer, to whom your letters were referred, has to-day submitted reports from Mr. U. Valiquet, Superintending Engineer, and Mr. H. M. Davy, Engineer-in-Charge of Test Borings, together with a letter from Mr. Angus McDonnell, for Grant, Smith & Company & McDonnell, Limited, the contractors (copies enclosed), all of which explain the conditions in connection with this contract, and furnish the information you desire.

I may add that with a view to having the matter more fully inquired into, the Minister of Public Works has stopped the work and has instructed Mr. A. St. Laurent, the Assistant Deputy Minister, to proceed to Victoria at once, to make a thorough further investigation and report as soon as possible.

I am, Sir, your obedient servant,

J. B. HUNTER, D.M.

The Auditor General.

ROYAL BANK CHAMBERS, OTTAWA, December 13, 1915.

SIR,—Test borings were started at Victoria, September, 1912, to determine the materials in the Outer Harbour underlying the Proposed Wharves and Berths as laid down by Mr. Coste, Consulting Engineer.

From Rithet's Pier No. 2 along the water front for 2,000 feet south, cross-sections of borings were made every 100 feet. In all, 202 borings were made of which 147 showed solid rock at varying depths from 7 to 80 feet below low water.

SESSIONAL PAPER No. 1

The solid rock, which is Gneiss or Stratified Granite, has a very uneven surface, forming humps or peaks. The slope of the rock was found to be 12 to 20 feet in 100, the 30-foot rock contour being found at about 300 feet from shore and the 70-foot contour at 500 feet. At 900 feet from shore no rock was found at a depth of 130 feet below low water, so these borings were not continued deeper.

The materials overlying the rock consist mainly of sand, clay, and a mixture of sand clay and gravel; the top or first material penetrated is the sand, which for 600 feet out from shore extends down to within 3 feet of the solid rock. The borings further out from shore than the above showed about 15 to 20 feet of loose sand overlying a layer of packed materials (sand, clay, gravel), from 1 to 2 feet in thickness. Below this was found a soft clay which extends almost to the solid rock. Immediately overlying the rock about 3 feet of packed sand and gravel was found.

Along the line of the south side of the Breakwater borings were taken to 1,500 feet out from shore, which showed the same materials as in the borings farther north.

In this locality the solid rock dips off much slower; the 70 foot contour being found about 800 feet out.

Owing to the large quantity of rock located by the borings, the original location of the piers, etc., were changed. The very irregular formation of the rock is noticeable on the immediate shore at low tide.

The enclosed plan shows the location of the Outer Harbour. The areas coloured show the localities test bored for proposed improvements.

I am, sir, your obedient servant,

H. M. DAVY, *Eng'r-in-Charge Test Borings.*

The Minister of Public Works.

OFFICE OF THE SUPERINTENDING ENGINEER,

OTTAWA, December 9, 1915.

SIR,—With reference to a letter dated December 1, from the Auditor General, asking for a report on the excess of rock excavation returned in the progress estimates over that estimated before calling for tenders for the piers being built in Victoria Harbour, B.C., I beg to state that I visited the works at the end of October and made an investigation as to the classification of the materials excavated.

In a letter dated August 20, the Resident Engineer, Mr. McLachlan, reported that a large quantity of hard material consisting of a conglomeration of cemented stone, gravel and clay, that could not be removed by dredges, and amounting, together with the rock, to about 30,000 cubic yards, were being returned as rock excavation in the progress estimates, as it had to be blasted before removal; this classification was allowed under clause 23 of the specification, which says that any material overlying the rock that can be removed with a dredge shall be considered as earth.

The specification also says that all earth material overlying the rock shall be removed before the rock excavation is proceeded with.

The earth excavation, amounting to about 32,000 cubic yards, was done by an ordinary clam shell; this plant could not, however, excavate the harder

conglomerate; a five ton clam shell was brought from Vancouver; after several days trial it was sent back and a powerful dipper dredge was tried. After serious efforts, during which three spuds and several dipper teeth were broken, the Contractors and the Resident Engineer decided that blasting had to be resorted to.

The drilling of the conglomerate and solid rock had been completed before my visit and only about 6,000 cubic yards of the material remained to be removed, after blasting. No solid parts of the conglomerate could be seen on account of its disintegration by blasting and removal by the dredge and deposited under water as filling between the pier walls. Mr. McLachlan had to be relied on for the above information. I have no reason whatever to doubt the correctness of his statements, but he told me that during the process of removing the blasted material, large pieces of solid conglomerate were brought up.

With a view of obtaining personal information about the nature of the materials, the dredge was ordered to the site and placed near the edge of the cut that had been excavated. After getting a few dippers full of loose material the hard bank of conglomerate was struck and a dipper tooth was broken; after repeated trials in my presence, I was satisfied that the excavation with a dredge was impracticable.

A sharp-pointed steel rod was then procured and from a rowboat repeated trials were made to penetrate the bottom consisting of the same kind of material. After going through 15 to 18 inches of soft ground no impression could be made by repeated blows of the sharp point.

I also examined the very detailed records of the steam drill work kept by the contractors from measurements taken on the drilling rods from the drill scow in the presence of the Government inspectors; these records show that the drilling through the conglomerate was at the rate of 5 to 7 feet per hour, which is the ordinary rate through solid rock. Five 4-ton drills are mounted on a large scow; it is a first-class piece of machinery.

After obtaining personally this information, I wired you as follows:—

“Am satisfied that classification of dredging allowed at Victoria piers is correct according to specification. Would recommend that removal of blasted rock, amounting to about six thousand yards, to complete dredging and ordered to be stopped a few days ago, be authorized to be resumed.”

In order to compensate for the very irregular formation of the rock surface and the impossibility of reaching certain quantity of earth in pockets, in some cases 10 to 12 feet deep, the Resident Engineer suggested that 20 per cent of the rock classification be deducted, to which I agreed; the Contractors, however, strongly objected; they contended that 12 per cent would be nearer the proper deduction. The quantity is returned in the progress estimate after deducting 20 per cent.

With a view to ascertaining whether any error had been made in laying out the piers and bulkheads, Mr. C. C. Worsfold, District Engineer at New Westminster, was instructed to check the measurements, and he has reported that the works are located in the proper position.

The general plan with soundings was prepared from a survey made in 1912, under the direction of the late Mr. Keefer, then the District Engineer.

The test borings, to ascertain the rock elevations, were taken in 1913, by Mr. H. M. Davy of this Department.

The contract plans and specifications were prepared by Mr. E. S. Miles, who has since resigned and left the Department; he also calculated the quantity of rock from the plan and found the amount mentioned in the schedule list; the rock excavation was also recently calculated from the plan by two independent parties, who found practically the same quantity mentioned in the schedule list.

SESSIONAL PAPER No. 1

I must say that accurate calculations can not be obtained from the plan owing to the very irregular surface of the rock and the number of borings not being sufficient. The location of the piers on the contract plans was also changed from the original position, on which the borings were taken.

It must be concluded that the excess quantity, returned as rock, is due to the hard material overlying the rock, and which could not be removed without blasting.

Four tenders were received for the construction of these works; the prices per cubic yard of rock were \$6.00, \$8.00, \$9.10 and \$12.00. The tender in which the price of \$6.00 is quoted is about \$750,000 higher than the total of the accepted tender.

I have the honour to be, Sir, your obedient servant,

U. VALIQUET, *Superintending Eng'r.*

Chief Engineer Public Works Department.

OTTAWA, December 3, 1915.

SIR,—With reference to classification of material dredged from the site of the Victoria piers, for which my firm has a contract, I beg to submit the following statement:

Prior to June last, with our own clamshells, we had attempted to remove some of the material to be dredged, and found that our machines could not handle the material, and, in fact, the small amount of material we were able to remove cost us over \$2.00 per cubic yard, for which we were receiving 57c.

The estimated quantities showed approximately 50,000 cubic yards of earth, and 4,000 cubic yards of rock.

About the end of May, Mr. C. E. MacDonald, of Vancouver, approached us with a view to taking a sub-contract for the dredging. We sublet the dredging to him and he brought the *John A. Lee*, the biggest clamshell dredge on the coast, over on the work, which worked there during the months of June, July and part of August. During the month of June he clammed all over the ground to be dredged, but was unable to get any quantity of material as it was too hard. The end of June he made arrangements with Henry, McFee & McDonald, of Vancouver, to bring over their drill boat to drill a shoot in the hard material, and during the month of July and the first part of August got a certain amount of the hard material out with the *Lee*, but as she was even then not handling the material satisfactorily, he sublet the dredging to the Pacific Coast Dredging Company.

After we had sublet the dredging to Mr. McDonald none of our men paid any attention to it, as we were very busy getting our marine ways ready for launching the cribs.

About three months ago Mr. McLachlan came to me saying that he anticipated some comments from Ottawa as the quantity of higher priced material was very largely overrunning the preliminary estimate, and suggested that he should retain 20 per cent of the material he felt he should classify as rock, pending the decision of the Chief Engineer, his reasons for wishing to do so being that a large proportion of the material it was necessary to drill and shoot to remove was not actually rock, but a conglomerate of boulders and hard material. I told him at that time, that as none of our own people had paid any attention to the

dredging since it had been sublet, we were not in a position to judge, but I considered that he had no more right to hold back any material that according to the specifications should be classified as rock, than to give any material as rock that should be classified as earth, and that I wanted all material classified as rock that we were entitled to and no more, and it was up to him to watch the work done by our subcontractors and classify the same according to his own judgment.

After Mr. MacDonald had in turn sublet the work to Henry, McFee and MacDonald, and to the Pacific Dredging Company, on which he was making a profit, Mr. MacDonald informed me that one morning his bookkeeper, a Mr. Mallory, came to him and demanded a quarter interest in his contract from us, stating that if he, C. E. MacDonald, did not do as he demanded he would make trouble for him. Mr. C. E. MacDonald then discharged him. Mr. Mallory, I understand, then went to Mr. Barnard, the Dominion Member for Victoria, and made certain allegations to the effect that the Contractors were getting over classification for the material dredged on our work.

Mr. Barnard, I understand, wired the Department requesting an investigation, and that an engineer be sent out from Ottawa. We received instructions to suspend dredging operations pending investigation, which we accordingly did.

On Mr. Valiquet's arrival in Victoria I told him that since the dredging had been sublet to Mr. MacDonald our own men had not paid any attention to the work, but had merely accepted the figures given to us by the Dominion Government Engineer, on which we were paying our subcontractor, therefore we were not in a position to judge, but were quite willing to accept his ruling on the classification whatever it might be.

I made arrangements for the Pacific Coast Dredging Company's dredge to be on the site of the work, and Mr. Valiquet had it moved to different places, on the site, and made several tests in the face of the cut already taken out. I may state this is the most powerful dipper dredge in Canadian waters on the Coast.

Mr. Valiquet then went over the records that had been kept in the drill boat for the Contractors own cost sheets. These show that the drills averaged approximately 7 feet per hour after striking hard material. The Government Engineer had an inspector on the drill boat, and kept a record of each hole drilled and the depth at which the hard material was encountered, from which records, I understand, the Government Engineer plotted the cross sections. Mr. MacLachlan informed me that he had deducted 20 per cent from the total of hard material thus arrived at in making up the classification of material removed. I may state that the steam drills employed weigh 4 tons on a 3-inch bit before steam is turned on.

Mr. Valiquet, after making these tests, informed me prior to his departure that he approved of the classification given.

You informed me that a statement has been made that only 600 cubic yards of rock had been removed up to August 10, while estimates up to August 31 show 18,288 cubic yards. I am unable to say during what months the hard material was removed by our subcontractor, as our people were not on the dredges, but would judge the majority of the soft material which was removed by the *Lee* off the top in the first months, but cannot see how the total quantity of hard material moved to date can be questioned after tests made by Mr. Valiquet and cross sections derived from the drilling records.

As the statements of Mr. Mallory, who, I gather, has not a very enviable record, upon investigation, were unsubstantiated, I think it is working a hardship on our subcontractor that he should stand the loss for suspension of the work during investigation, as set forth in my previous letter to the Department, and

SESSIONAL PAPER No. 1

as the classification has been approved by your investigating engineer, I consider it a very arbitrary and unjustifiable proceeding of the Auditor General's Department holding back our estimates.

Yours truly,

ANGUS McDONALD,

for Grant, Smith & Co., and McDonnell, Ltd

Chief Engineer, Public Works Department.

British Columbia Dredging: Purchase of Coal.

AUDIT OFFICE, July 23, 1915.

SIR.—In connection with the purchase of coal in 1913-14 for the Dredges *Ajax* and *Mudlark* in British Columbia, I am informed that tenders were called and that one firm tendered for \$5.25 per ton. I see by the accounts rendered that the coal was purchased from Kirk & Company and paid for at \$7.00 per ton.

I have to request that you will let me know what tenders were received and if the lowest tender was accepted, or, if not, why it was not accepted.

I am, Sir, your obedient servant,

J. FRASER, A.G.

The Deputy Minister of Public Works.

DEPARTMENT OF PUBLIC WORKS,

OTTAWA, September 23, 1915.

SIR.—Replying to your favour of July 23 last, regarding prices of coal in 1913-14 for this Department's Dredging Plant in British Columbia, I have the honour to forward you herewith copy of a report, with enclosures referred to therein, from the Assistant Chief Engineer, which will inform you fully as to what transpired in this connection.

You will please note that the firms to whom contracts were awarded for delivery of coal to Government vessels were unable to make delivery on account of the serious strike which took place in the British Columbia mines that year; and this Department necessarily had to purchase coal in the open market at an advanced price.

Will you also kindly note that the Department's experience in this connection led it to install oil burning apparatus in nearly all the units of the British Columbia Fleet.

Your obedient servant,

J. B. HUNTER, D.M.

The Auditor General.

AUDIT OFFICE, October 29, 1915.

SIR,—I have to acknowledge receipt of your letter of 23rd September regarding the price of coal in 1913-14 for the Dredging Plant in British Columbia, enclosing a copy of the reports of your officials in the matter.

I was in British Columbia recently and saw Mr. Nelson, your agent, Mr. Kingham and Mr. Kirk, and obtained their version of the matter.

It appears that when the strike in the British Columbia mines took place Mr. Kingham informed the captains of the dredges that he could not supply Nanaimo coal, but offered to supply American coal instead as provided in his tender. This was not accepted. Mr. Nelson says he received word from the captains of the dredges that they could not obtain coal from Kingham. He then telephoned them to ask Mr. Harry Price to obtain the coal. Mr. Kirk told me that Mr. Price came to him and asked him to supply the coal, which he did, but he had to pay Price fifty cents a ton for obtaining the order. Mr. Kingham says he did not refuse to supply coal, but offered to supply American coal, and was in a position to do so at \$5.75. He points out that he continued to supply at this price to the Quarantine Station.

I enclose herewith copy of a letter from Mr. Kingham, and the statements contained therein are of such a serious nature that I think your Department should have the matter thoroughly investigated, not only as to the coal for 1913-14, but also for subsequent purchases.

I am, Sir, your obedient servant,

J. FRASER, A.G.

The Deputy Minister of Public Works.

Vancouver Wharf: Henry, McFee & McDonald.

AUDIT OFFICE, November 18, 1915.

SIR,—I enclose herewith a statement in connection with the Vancouver Wharf, Henry, McFee & McDonald, Contractors, showing estimated quantities as compared with actual results, and have to request that you will let me have an explanation from your Engineers as to why these results are so much in excess of the estimate.

I am, Sir, your obedient servant,

J. FRASER, A.G.

The Deputy Minister of Public Works.

AUDIT OFFICE, OTTAWA, June 10, 1915.

Re Graving Dock—Kingston.

SIR,—On October 14, 1913, the Kingston Shipbuilding Company, the lessees of the Kingston Graving Dock, paid \$10,000, the rent for the year expired April 30, 1913.

Nothing has since come to account, making two years' rent due April 30 last, \$20,000.

Awaiting explanations.

I am, sir, your obedient servant,
The Deputy Minister of Public Works. J. FRASER, A.G.
